Please watch the movie and join us for an open discussion and review of "Kiss the Ground".

Narrated and featuring Woody Harrelson, Kiss the Ground is an inspiring and groundbreaking film that reveals the first viable solution to our climate crisis. Kiss the Ground reveals that, by regenerating the world's soils, we can completely and rapidly stabilize Earth's climate, restore lost ecosystems and create abundant food supplies. Using compelling graphics and visuals, along with striking NASA and NOAA footage, the film artfully illustrates how, by drawing down atmospheric carbon, soil is the missing piece of the climate puzzle. This movie is positioned to catalyze a movement to accomplish the impossible – to solve humanity's greatest challenge, to balance the climate and secure our species future.

Available to stream on Netflix (full) or click [here](#) for the educational version (password: school)

R.E.A.D BOOK CLUB COLLAB

Hidden Figures

By: Margot Lee Shetterly

We are excited to announce another collaboration with R.E.A.D book club to discuss the untold story of the black women responsible for helping NASA win the space race through mathematics! Pick up a copy at your local library (or anywhere else you get your books/ audiobooks) and bring your questions and comments!
